TEAM INVITATION | INDIE PROJECT

ECHOES OF ETERNITY

Every memory leaves an echo.

A forgotten world. Memories that still breathe. And a journey to find out what remains.

Come build this world with me.

Metroidvania | Godot 4 | PC / Steam | November 2026

THE GAME

Explore what is left of the world

Echoes of Eternity is an exploration and adventure game in the Metroidvania style, set in a medieval fantasy universe. You explore a mysterious kingdom, uncover the ruins of a vanished civilization and use a special ability, Resonance, to see memories of the past.

The focus is not traditional combat. The experience is built around exploration, puzzles, discovery, environmental storytelling, mysterious characters and emotional moments.

> *Discovering the past through echoes of memory.*
>
> The essence of the game.

KEY FACTS

GENRE
Metroidvania / Adventure

ENGINE
Godot 4 (GDScript)

PLATFORM
PC / Steam

PLAYERS
Single player

VISUAL
Detailed pixel art with lighting

CAMERA
Side view, 2.5D perspective

THE CORE MECHANIC

Resonance

The ability that connects past and present: the player perceives traces of ancient events and uses that information to understand and change the present.

01 Perception

Reveals hidden elements, symbols, tracks and invisible objects.

02 Memory

Shows events that took place in that spot in the past.

03 Reconstruction

Lets you see or temporarily restore ancient structures.

04 Interpretation

Helps you understand clues and solve puzzles.

PUZZLE EXAMPLE: THE BROKEN BRIDGE

1	2	3	4	5	6
Activates Resonance	The bridge appears as it was	Studies the mechanisms	Finds a hidden lever	Finds the lever in the present	Solves it and crosses

DESIGN RULE Resonance is not just a visual effect: it directly shapes exploration.

THE WORLD

The kingdom of Véspera

Cities still standing, castles intact, regions frozen in time. But the people are gone. A curse? Forbidden experiments? A force that should never have existed? The player does not know which story is true, and neither does the protagonist, a traveler with no name and no past.

1 Forgotten Village

Starting area: story, controls, first puzzles and first traces of memory.

2 Forest of Echoes

Giant trees, hidden passages, ancient ruins and natural mysteries.

3 Castle of the Ancients

Secret rooms, documents, complex mechanisms and discoveries about the kingdom.

4 Crystal Abyss

Deep caves, mysterious crystals and environmental puzzles.

5 Celestial Sanctuary

Advanced area: great mysteries and story revelations.

Region names and contents are still provisional. You can help define them.

ART DIRECTION AND AUDIO

Atmosphere and depth

Visuals

- Detailed pixel art with dynamic lighting
- Deep shadows, fog and particles
- Multi-layered scenery with parallax
- 2D characters, side-scrolling movement
- A unique color palette for each region
- 3D elements where they help

Music and audio

- Piano for emotional moments
- Soft orchestra for important moments
- Ambient sounds for exploration
- Unique music for each region
- Sound effects for Resonance
- Silence in moments of tension

The soundtrack is not defined yet: there is room for a musical identity to be born.

THE FIRST BIG GOAL

The first playable demo

A demo of the first area, the Forgotten Village: a small part of the game truly working.

1. A controllable character
2. Movement and jumping
3. Side-view camera
4. Pixel art scenery
5. Lighting and shadows
6. One explorable area
7. A simple puzzle
8. The first Resonance showcase
9. A small story discovery

Explore, solve a puzzle and use Resonance. That is our first milestone.

WHO WE ARE LOOKING FOR

Your place in this world

Programmers

Godot 4 and GDScript: movement, Resonance, puzzles, interactions and the save system.

Pixel artists

Characters, environments, animations, lighting and particles to bring Véspera to life.

Composers and sound designers

A soundtrack for each region, ambient sounds and the sound effects of Resonance.

Testers

Find bugs, test performance, controls and accessibility, and suggest improvements.

Not sure where you fit? Come talk to us. Ideas and questions are welcome too.

HOW TO JOIN

Let us build it together

GET IN TOUCH

No forms, no red tape: just send me a private message and tell me how you would like to help.

UNPAID PASSION PROJECT

There is no budget: collaboration is voluntary, and roles and permissions are agreed with each person.

FIRST STEPS

1. Message the project director on Discord or by email.
2. Introduce yourself and tell us how you would like to help.
3. Agree on your role and permissions with the director.
4. Help build the first demo of the Forgotten Village.

Our goal is not simply to make a game. It is to build a world that makes the player want to discover every secret.
